Who am I

Senior iOS engineer with 7+ years of experience building and scaling production mobile apps.

Worked across large-scale consumer apps with **10M+ downloads** and early-stage international startups.

Focused on code quality, performance, and UX, building **crash-free apps** with **80% test coverage**.

Professional Experience

Audiostreaming, NDA

iOS audio streaming platform with 10M+ downloads and 3M+ MAU

Senior iOS Engineer, Nov 2024 - Present

Built a partner-facing iOS SDK that embeds our UI flows into third-party apps, with a footprint of **5 MB - 5% of the main app bundle**.

Turned feature requests from **6 stakeholders** into execution plans and led delivery across **4 developers**.

Improved hitch time ratio from **12 ms to under 5 ms (2.5x faster)**.

Maintained zero Auto Layout warnings, zero hangs, and a **crash-free** experience, with UI tests guarding against regressions.

Clothing Brand, NDA

iOS app with 10M+ downloads and a 4.9 App Store rating, 700+ physical stores across 5 countries

Senior iOS Engineer, Mar 2023 - Nov 2024

Owned delivery of core user-facing features related to the app's purchase and engagement flows, while leading **2 junior iOS developers**.

Optimized core network requests, speeding them up by up to **2.5x**.

Improved responsiveness of the main BDUI screen by reducing **hitches and hangs by about 2x**.

Built core shared services used by a team of **6 developers**, with **80%+ test coverage**.

AURA Devices

iOS companion app for a fitness hardware startup developing body-composition devices

Middle iOS Engineer, May 2021 - Mar 2023

Integrated in-app subscriptions, contributing to **\$50,000+ in product revenue**.

Designed and implemented a **graph search-based on-device algorithm** for personalized user guidance.

Built and optimized **custom Core Graphics-based charts** for smooth, hitch-free scrolling.

Reduced **raw Bluetooth data parsing failures** in a critical Apple Watch flow by **27%**.

Ubibi

iOS marketplace app for automotive goods and services in an early-stage startup

Middle iOS Engineer, May 2020 - May 2021

Architected the app with **MVVM and RxSwift**, focusing on **reusable UI patterns** and **complex filtering flows**.

Automated **core development workflows**, including **design asset delivery** and **OpenAPI-based API code generation**.

Fogstream

iOS app for electronic signature workflows with document signing and authentication flows

Junior iOS Engineer, Mar 2019 - May 2020

Integrated a **C library with custom cryptographic algorithms** into the iOS codebase.

Resolved a **deep flaky crash** related to **manual memory management**.

Projects & Achievements

Trackerus: Built a time-tracking app with **6.4K+ downloads** and a **4.7 App Store rating**. [App Store](#)

Fremo: Built a freelance productivity iOS app with a **5.0 App Store rating**. [App Store](#)

Competitions: Tinkoff Solutions Cup 2023 & Yandex Cup 2023 finalist [Interview](#)

Hackathons: Amur Digital Hack & Digital Breakthrough hackathons winner

GDG Devfest: gave a talk on Kotlin Multiplatform + hosted a SwiftUI workshop [YouTube](#)

Articles: Co-authored a Skillfactory Media article on native vs. PWA tradeoffs [Link](#)

Education

Master's degree, Applied Computer Science, ITMO University

My tools

Languages & Frameworks: Swift, UIKit, SwiftUI

Architecture: modular apps, DI, state management, scalable UI patterns

App Infrastructure: analytics, feature flags, remote config, release tooling

Performance: Instruments, startup time, memory, scrolling/rendering performance

Testing: unit tests, UI tests, regression prevention

Delivery: CI/CD, App Store releases, observability, crash monitoring

Collaboration: product thinking, technical planning, mentoring
